Sir,

Just so you are aware, Dave is out of the office this week. I will talk with him about timing for this meeting when he returns. If you don't hear back from one of us by the middle of next week, please feel free to send us a gentle nudge.

We look forward to meeting with you and hope you have a nice Thanksgiving.

Sincerely,
Christine Doucette

Hi Guys!

Ed - thanks for reaching out as I didn't receive John's email (junkmail). Unfortunately it is too late for me to pull together a meeting this week, and if I told you what the remaining 5 weeks in 2019 of my calendar look like, you wouldn't believe me -- I will only be in "in the office" for 2 of the 5 remaining weeks, and both of those weeks will have me both in and out of the office for priority meeting as we close out the year. On top of this, BPD is transitioning to a new RMS, the result of which has crashed all of the priority BRIC data systems and tools, and I can't even begin to explain the disruption to our operation that this has caused and the pressure from the top of the organization to get things fixed. All ongoing projects we were implementing had to be put on hold as a result, so now additional things that have money allocated toward them have been put on hold. So we are really in jam here at this period of time and any additional meetings -- especially related to new technology or capabilities -- will push us over the edge.

I'm thinking it might be best for me to try to set up a call with John to discuss the platform and then determine when a good time for a visit and demonstration might be -- literally just to keep in touch and ensure this doesn't fall through the cracks. I do in fact want to receive a demonstration and learn more, so please understand my sincerity here. I hear good things about the product, it may fit a gap we have, so it is important that I at a minimum get a good briefing on exactly what it is.

I realize this is not what we were hoping when we talked briefly in Alexandria, but how does this sound John? I've CC'ed Christine Doucette from my office as she is basically my life coach and keeps my head from spinning off my shoulders. She'll help us keep this rolling if I'm unable to get to my email for days at a time.

Thank you,

Dave

Director Carabin,

Thank you for stopping by our booth at the NFCA Conference last week in Alexandria and I would also like to thank Joel Cohan for talking with you about us. I know you were rushed for time Director and I was hoping to set up a meeting where I can demonstrate our full OSINT capabilities and talk through some of the concerns and issues that surround our technology. I am a retired Lieutenant with the Hartford Police Department and left as the Intelligence Commander in 2018. We were able to navigate several of the privacy concerns by demonstrating that our capabilities do not exceed that of publicly available/open source material. We are not attached to a specific social media hose (i.e. DataMinr) and therefore have stabilized our software across several platforms within the Open, Deep, and Dark Web.

I still live outside Hartford and travel to Boston all the time to see my family. If you have any time on November 18th or 19th I will be in town or we can set up something remotely at your convenience.

Please let me know what works for you Sir and we can accommodate. I have also attached a few use cases and our brochure. Thank you and Stay Safe.

This is the company that blew me away at IALEA down in DC last year. I imagine it's a long shot for us to invest in anything of this nature given current events/climate, but it still might be good for some in the office to get a sense of what's out there.

Tomorrow's webinar is up my ally and weds might be cool for Liz to see.

What do you think about sharing this with others in the office that might have an interest?
