KENT POLICE DEPARTMENT

Rafael Padilla
Chief of Police
Phone: 253-856-5885

Memorandum

DATE: March 29, 2019
TO: Chief Padilla
CC: A/C Kasner, Commander Durham
FROM: J. Davis
RE: Purchase of additional Eye Detect licenses

I. Position

Authorize the purchase of additional Eye Detect Truth Verification Licenses and update 1 aging instrument.

II. Background

In Fall of 2017 the Kent Police Department adopted the use of truth verification technology commonly known as Eye Detect. This technology measures the pupil dilation of a subject while at the same time questioning them regarding their involvement in behaviors which have been deemed by the City of Kent as Disqualifying. The instrument then analyzes those measurements and indicates whether the subject is likely being "Credible" or "Deceptive".

Based on administering over 200 exams for the City of Kent, we have experienced a consistent accuracy rate of 86%. This accuracy is based on actual field use, not lab results. This is important to note, because the normal biases or error rates which accompany polygraphs, which studies show have an accuracy range of 77%-90%.

In October 2018, Officer Briann Knott and I travelled to Utah where we received advanced training in administering the Eye Detect Exams. This training has allowed us to write our own specific issue exams, which we have done, to verify or disprove a subject's statements or disclosures.

As Background Investigators, we have relied on this instrument to aid us in detecting deceit, which in turn has benefited us in hiring quality candidates while saving money, time and resources (administrators, investigators, & polygraphers) on untruthful candidates and allowing those resources to be allocated elsewhere.

Of further note is a new protocol which will be released in the coming months. This new protocol will allow us to not only detect deception, but will indicate which line of questioning the subject is likely being deceitful. (Drug possession and usage, Criminal Behavior, Falsifying information disclosed, etc.)

III. Recommendation

- The purchase of 200 exam licenses at a discounted price of \$60.00 = \$12,000.00
- The purchase of an updated Eye Detect Instrument \$1,500.00 + shipping

IV. Conclusion

The purchase of these items would allow us to continue hiring quality candidates at the pace we have over the past 14 months.

Respectfully,
Justin Davis

QUOTATION

March 29, 2019

Justin Davis Kent Police Department

220 4th Ave S, Kent, WA 98032

jdavis@kentwa.gov

Quotation for EyeDetect Test Licenses:

Description Qty Unit Price Total

Test Licenses	Unit Price	Total
100	\$70	\$7,000
150	\$65	\$9,750
200	\$60	\$12,000

This proposal is valid until April 29, 2019. Terms of payment are Net 30.

Please let me know if you have any questions or need additional information. Thank you for the opportunity to be of service to the City of Kent.

EXTERNAL EMAIL

Hi Justin,

Great to hear from you! We can honor the \$1500 + \$50 shipping upgrade price. I'm including Leone on this email thread, feel free to reach out to him if you have other pricing questions in the future.

In order to do the upgrade, my colleague Paige (included on this email) will send you a return label for your V2 station. Please send us back everything included in your V2 station (tablet, stand, headphones, keyboard, mouse, ect.) and we will send over a V3 station once we receive the upgrade payment.

Thanks again for reaching out,

Jeremy BLAU

Good Morning Jeremy,

In October you quoted me \$1500.00 to upgrade from V2 to V3 station. Is this quoted price still good?

EXTERNAL EMAIL

Justin,

Sorry for the delayed response, the cost to upgrade a V2 station to a V3 station is \$1,500 plus shipping. This is a special, one time price but it does not include shipping costs.

To upgrade your station,

1. We will need you to ship back all of the station components in your V2 back to our office.
 - a. 610 S. 850 E., Ste #4 Lehi, Utah 84043-3945 USA
2. After we receive payment of the \$1,500 + shipping costs, we will ship out the V3 station to the address you indicate. We will use the working EyeTracker from your current station but the rest of the components will be new.

A spec sheet of the V3 station and its components is attached to this email. Please let me know if you have any questions or concerns.

Best,

EXTERNAL EMAIL

The cost of the V2 unit (Microsoft tablet) is \$3,500.

The cost of the V3 unit (Intel NUC and Monitor) is \$3,750.

I'll need to confirm with Russ what the cost of upgrading a station from a V2 to a V3 is. I know its substantially less as we use the same EyeTracker which is by far the most expensive component.

Best,

EXTERNAL EMAIL

Hello Justin,

Sorry to hear this is happening to you. We have seen this issue occur intermittently with the tablets. Sadly, your tablet is out of warranty, but we would be happy to swap out your tablet with an Intel NUC minicomputer and monitor at cost.

The setup I'm describing with the Intel NUC and monitor is the newest version of the station that we have moved to specifically to alleviate problems we have found in the Microsoft tablet (overheating and loss of charging ability.)

Let me know how you would like to proceed.

Best,

From: "Davis, Justin" <JDavis@kentwa.gov>

Jeremy,

Have you had any other reports of the Microsoft pro tablets not charging? My instrument will only charge to 2%. I changed cords with my work surface and it started to charge and then stopped.
