

How to recover a missing Tree menu

[Share this page](#)

ISSUE

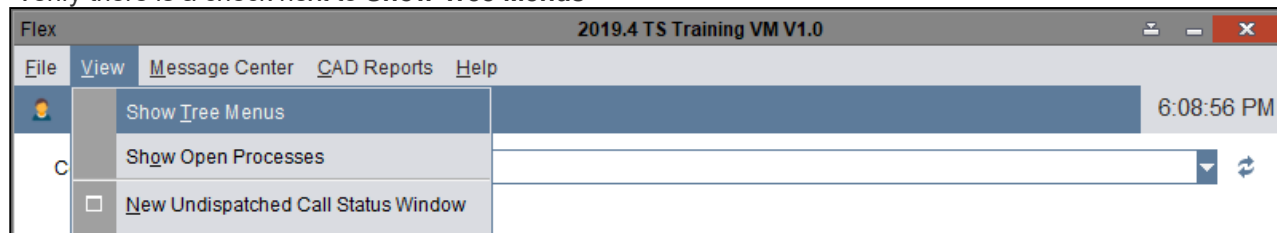

When users change computers frequently, or reposition their tree menu, there may be times when the tree menu cannot be seen on the screen. You can do the following in order to recover the missing tree menu.

ENVIRONMENT

- Flex

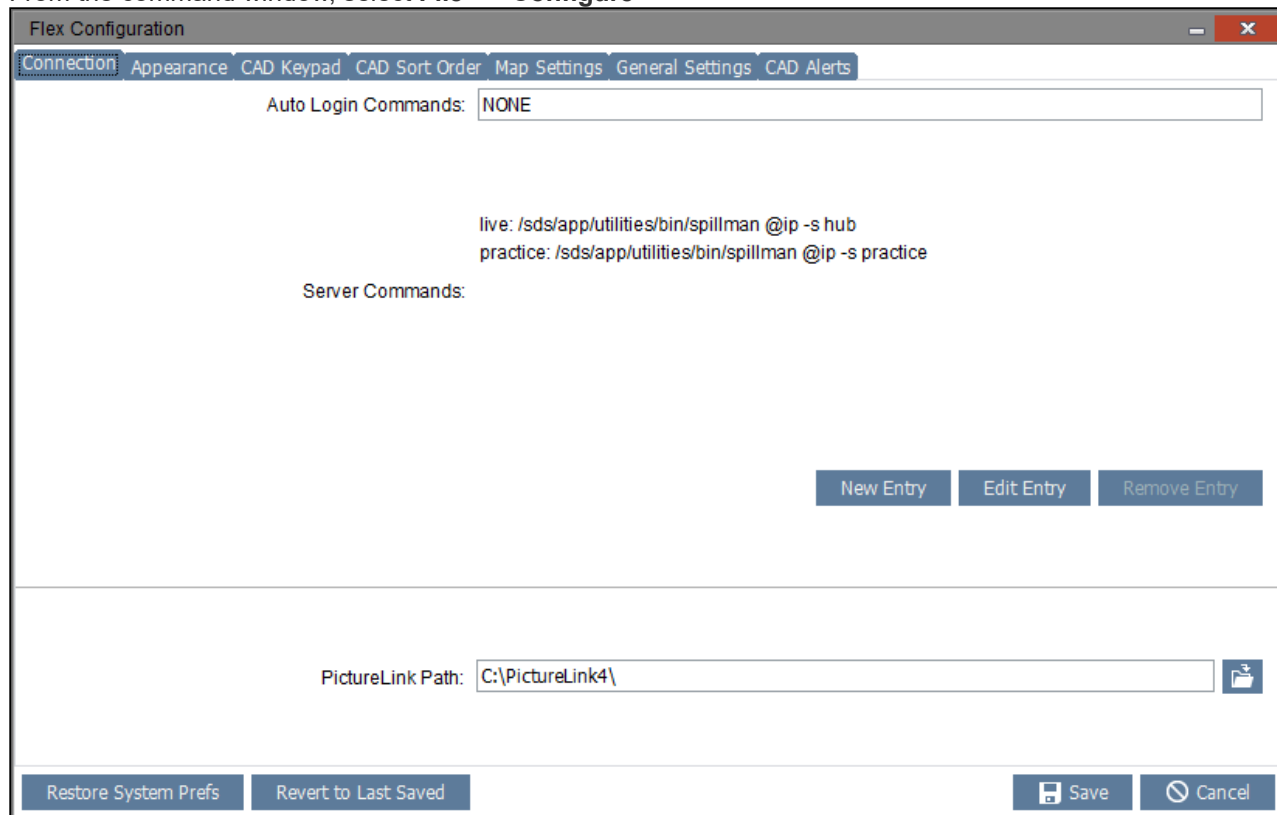

RESOLUTION

- You will first need to verify that the tree menu option has been selected by clicking **View** on the Flex tool bar. Verify there is a check next to **Show Tree Menus**

If the options above is checked and the Tree menu is still not appearing, then you can try the following steps:

1. From the command window, select **File --> Configure**

2. Go to the **General Settings** tab, and uncheck **Remember Window Positions**, as illustrated below:

Flex Configuration

Connection Appearance CAD Keypad CAD Sort Order Map Settings **General Settings** CAD Alerts

☒ **Remember Window Positions**

☒ Color Code Call Priorities

☒ Prompt Before Exiting

☒ Show Thumbnails for Images

☐ Use Standard Cut/Copy/Paste/Select All

☐ Use Insert Mode by Default

☒ Show Today Screen on Startup

☐ Auto Spell Check In Editor

☐ No Auto Correction In Editor

☐ Use Sentryx Keyboard Shortcuts

☒ Use Classic Window Focus (Requires Restart of Application)

☐ Force Command Line to Uppercase

Evidence Scanner synchronized folder: C:\Documents and Settings\All Users\My Documents

List

Max Number of Pages Per Transfer: 2

Max Number of Transfers to Store: 3

Default Printer

☒ Use Windows Platform

☐ Use UNIX Platform

Involvements

☐ Show Involvements in a Graph

☒ Show Involvements in a List

Command History

Max Command History to Save: 20

Quick Commands Shortcut

☐ CTRL ☐ ALT ☐ SHIFT Key: 0

Restore System Prefs Revert to Last Saved Save Cancel

3. Click **Save** and then exit the Flex client
4. When you log back into Flex, your window positions and tree menu should be back to their default locations
5. You can then repeat the process above and re-check **Remember Window Positions**. The next time you log in, Flex should remember where you re-positioned your windows
6. If this process doesn't work for you, then refer to removing the defaults.txt file to reset all user settings to default
